- ✓ 100% made in Italy.

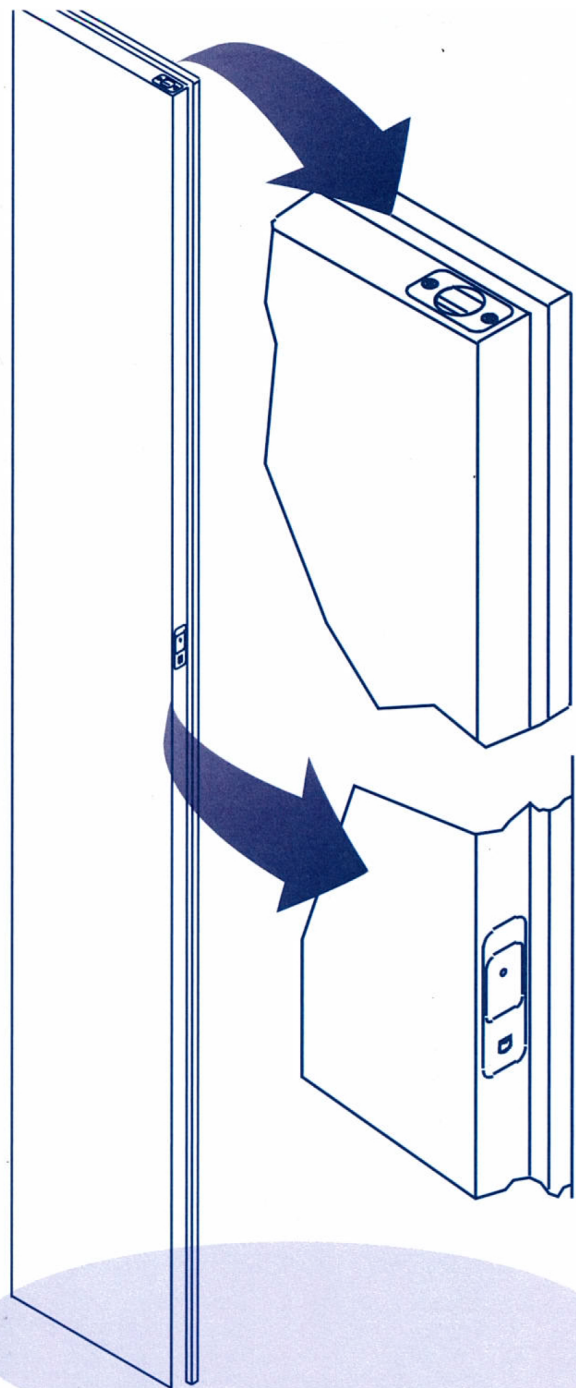

Eliminates reaching for awkward flush bolts
Simply 'Push & Go'

With Push & Go Evo, keeping the inactive leaf of a double door closed is now quicker & quieter than ever, thanks to Push & Go's unique design. Once the door is in the closed position, the magnetic latch self engages and the door is securely in place. An effortless action.

With Push & Go Evo, opening the inactive leaf of a double door has never been simpler. At the push of a button, Push & Go's magnetic latch retracts and the door can be opened.

Simply 'Push & GO'

Push & Go Evo magnetic flush bolt is designed to release the inactive leaf of a double door at the push of a button.

Compared to a traditional flush bolt, Push & Go Evo improves door and jamb aesthetics and makes access much easier for children, the elderly or the disabled. Push & Go Evo can be installed at a height that is just above the latch, eliminating the need to stretch and reach to retract a traditional flush bolt.

The ease of operation is especially useful in places where double doors are opened frequently or quickly in emergencies, making it ideal for hospitals, aged care, schools & apartment buildings. Door closure is guaranteed by a concealed self latching magnetic catch, simply push the door into the closed position.

Push & Go Evo is available in multiple finishes and is designed for Timber and Metal frame jambs. Made 100% in Italy.

Timber Jamb Versions

Code	Description	Finish
